

Axia Focus 24/7

Durable and comfortable

The basic principle when developing the Axia Focus 24/7 was comfort and durability, combined with a suitable design. The Axia Focus 24/7 is a chair with minimum energy contents and can be fully recycled after intensive use. The chair is extremely comfortable. The operators back is continuously and correctly supported by the moving back section. This functionality promotes a correct posture.

Reasons why the Axia Focus 24/7 is durable:

- three years full guarantee for 24/7 use
- minimal energy content
- 100% recycling
- conforms to Ansi Bifma, NEN-EN1335, NPR1813 and BS5459

Reasons why the Axia Focus 24/7 is comfortable:

- Dynamic Pelvis Support System (correct back support thanks to auto-adjust back section)
- extra thick ergonomically shaped cushions
- simple to operate
- adjusts to body weight

Ergonomically shaped cushions

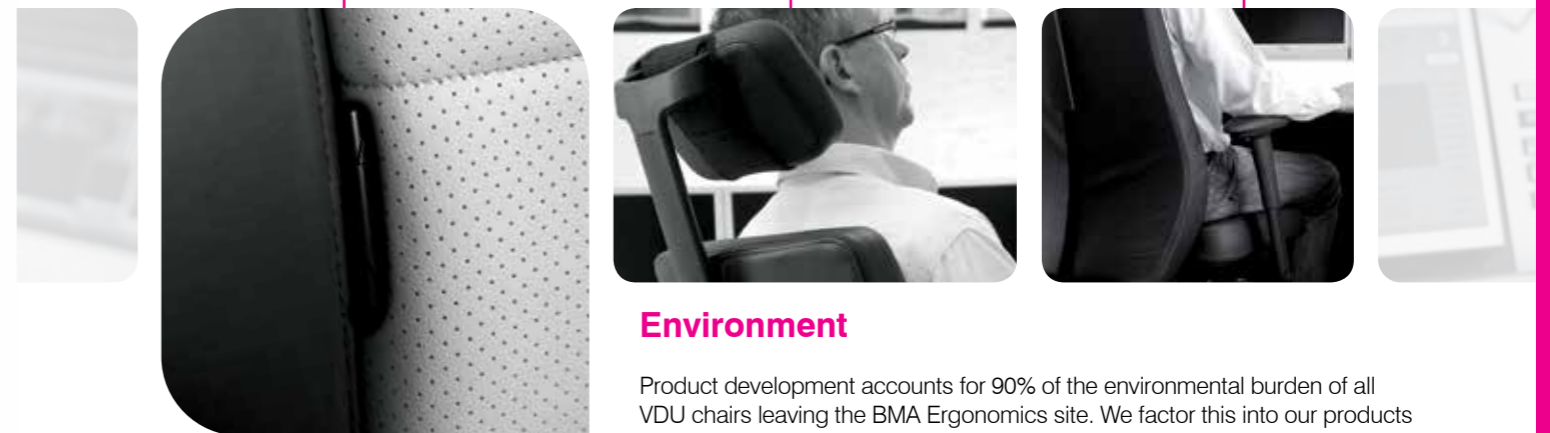

The movable mid section of the back cushion provides correct and constant support for the back.

Headrest

The Axia Focus 24/7 headrest is height and angle-adjustable. This provides maximum support for the head, putting minimum force on the neck.

Adjustable pelvis support

The lower back section of the Axia Focus 24/7 is fitted with an adjustable pelvis support, which provides additional support for the lower back and which can be adjusted according to personal requirements.

Environment

Product development accounts for 90% of the environmental burden of all VDU chairs leaving the BMA Ergonomics site. We factor this into our products at development using the following environmentally friendly criteria: reduced energy content, extended working life and maximised recycling.

Axia allows you to keep office interior costs and 24/7 enviro costs down while also reflecting your corporate social responsibility.

After years of intensive use, we will refurbish your VDU chair from top to bottom, upon return of your Axia to our premises in Zwolle.

It will then be returned to you as good as new, for many more years of faithful service.

Axia Focus 24/7

The Axia Focus 24/7 conforms to:
Ansi Bifma, NEN-EN1335,
and BS5459

Axia Focus 24/7, the best of both worlds

Axia VDU chairs

An Axia (VDU) chair guarantees ergonomic seating comfort and contributes to an ideal working environment. The chair supports and relaxes back, neck and arms, resulting in the feet remaining in contact with the ground and preventing complaints.

Moreover, the chair can be operated by both left- and right-handed people. An Axia chair is therefore perfect for VDU, reading and writing activities.

The Axia Focus 24/7 is the ideal chair when the task will consist of both observation (monitoring and control) and intensive VDU work. The Axia Focus 24/7 exudes elegance and robustness, and thanks to the extremely solid construction, is ideally suited for 24/7 workstations. The chair meets with all ergonomic and strength requirements and offers a high degree of comfort.

The Axia Focus 24/7 is available with two different types of armrests. The multi-armrests are height, width and depth-adjustable. This type of armrest is not fixed to the mechanism and remain in place when the chair is used in its dynamic mode. This makes it suitable for both VDU and observation work. The Axia Focus 24/7 can also be fitted with armrests that fold upwards. The angle of the armrests can be adjusted by means of a rotary knob underneath. This type of armrest is recommended for workplaces where the work carried out mostly comprises observational activities.

The Axia Focus 24/7 offers the following features:

Adjustable pelvis support:

- by moving the levers up or down, the pelvis support can be easily adjusted according to personal requirements,
- the pelvis support follows the movements of the back, so that the pelvis is sufficiently supported at all times,
- the combination of thick padded seats and the Dynamic Pelvis Support System creates a high level of comfort.

Headrest:

- the headrest can be easily adjusted,
- removable and washable headrest cover,
- option to have the company logo embroidered onto the headrest cover,
- headrest covers can be ordered separately.

Implementation:

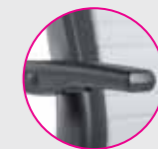

- reinforced mechanism with pictograms,
- polished aluminium base, Ø 71 cm, with maximum tilting stability,
- standard version: black leather, combined with 24-hour fabrics for intensive use,
- choice of multiple fabrics, also in the quick delivery programme,
- full leather versions available.

Functions of the Axia Focus 24/7

Headrest

Operation
on the headrest
Reach
- height: 12 cm
- angle: 60°

Armrests

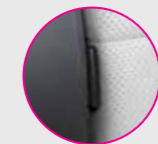

Operation
on the armrests
Reach

Flips backwards (type 8F):
- adjustable angle,
variable swing action

Multi (type 8N):

- height: 20-31 cm
- width/depth: 36-53 cm/4 cm

Backrest/pelvic support

Operation
with the levers at the front side
of the backrest
Reach
6 cm
